

Sonam Kapoor Blends Boho & Royal for Diwali

Published on 21 Oct 2025 | By IFI Correspondent

Sonam Kapoor stepped out this Diwali with confidence and style. She chose an outfit that wasn't just festive—it celebrated craftsmanship and personality. Her look came from designer Aseem Kapoor. The ensemble mixed boho ease with regal Indian décor. Indeed, she layered bold colours, rich textiles and artisanal detailings.

The Outfit: Rich Textures & Royal Tones

She wore a **voluminous red skirt** that featured hand-embroidered motifs. These ranged from geometric patterns to paisleys—a nod to traditional Indian craft.

Above, she paired it with a **structured maroon blouse**, heavy in detail and contrast. The outfit merged a bohemian silhouette (wide skirt, flowing motion) with desi opulence (deep colour, rich embroidery).

Styling: Accessories & Beauty

Sonam didn't shy away from accessories. Rather, she embraced chunky silver jewellery—statement earrings and stacked bangles—that brought boho energy to her desi outfit.

Her hair was styled neatly into a low bun. Makeup stayed balanced: soft kohl-rimmed eyes, flushed cheeks, luminous base, finishing with a subtle red bindi.

Why It Resonates

First, the colour palette speaks of festivity and tradition. Red and maroon are classic for Diwali, yet the boho design gives it freshness.

Second, it shows that one can mix styles: boho silhouettes + royal Indian fabrics = modern ethnic glamour.

Third, Sonam's choice celebrates **craft over glitter**—her look didn't rely on heavy sequins or overt sparkle but on detailed embroidery and textile richness.

Takeaway for Your Own Festive Wardrobe

- Choose bold colour contrasts: e.g., red + maroon, but in rich textures rather than plain.
- Mix silhouettes: a flowing skirt or bohemian cut with structured elements (like a fitted blouse).
- Accessorise thoughtfully: chunky silver or oxidised jewellery can bring a boho edge to traditional outfits.
