

Kylie Jenner Shines in Crystal Cut-Out Dress at Swarovski Event

Published on 01 Nov 2025 | By IFI Correspondent

Kylie Jenner turned heads at the Los Angeles opening of the Masters of Light – Hollywood exhibition by Swarovski. Her look: a custom black mini dress shimmering with crystals, designed by Swarovski's global creative director Giovanna Battaglia Engelbert.

With a front cut-out and sweetheart neckline, the dress accentuated Jenner's figure and kept the spotlight firmly on her styling.

Dress Details: Bold, Sparkling, and Stylish

The custom piece featured a bold cut-out at the front, dropping the neckline and showcasing the midriff subtly. The crystal embellishments created a high-impact, luminous effect under the lights.

She completed the look with Swarovski jewellery — statement rings, bracelets and earrings — which echoed the sparkle of the dress. Her hair was styled in tousled waves, and makeup emphasised glowing skin and nude lips.

Why This Look Matters

For Jenner, known for her bold fashion choices and glam-forward image, this appearance with Swarovski marks a high-fashion moment that aligns with luxury branding and red-carpet impact.

The Swarovski event is not just a typical gala — it is a showcase of heritage, craftsmanship and jewellery artistry, making her choice of a crystal-laden ensemble especially fitting.

Additionally, the cut-out element signals a fashion-forward edge; Jenner is balancing between glamour and trend-setting, using her platform to fuse luxury and boldness.
