On Halloween 2025, Alia Bhatt surprised fans by transforming into the adventurous video-game icon Lara Croft. Her look featured a braided ponytail, holster belt and monochrome power dressing.

Unlike a playful costume, the styling struck a balance between homage and high-fashion, making it feel editorial-ready.

The Outfit: Details That Stand Out

- Alia wore a fitted black T-shirt paired with matching black shorts, tucked in and cinched at the waist with a bold studded utility belt — capturing Lara Croft's utilitarian edge.
- Accessories included fingerless black leather gloves, thigh straps and knee-high boots, elevating the action-hero aesthetic without over-the-top theatrics.
- Hair was styled into a long, tightly braided ponytail — a clear nod to the character's signature look. Makeup was minimal: matte skin, softly defined eyes and a neutral lip, letting the outfit and posture lead.
- The campaign of photos was shot in black and white, giving it a cinematic and timeless feel.

What Makes It Work

- **Character meets couture:** Rather than a whimsical or overly flashy costume, the look stays grounded in fashion-forward styling. Alia channels Lara Croft's strength and attitude rather than simply the outfit.
- **Confidence at the core:** The simplicity of the base ensemble (black tee + shorts) allowed the styling elements (belt, gloves, boots) to build the character without overshadowing Alia herself.
- **Modern edit:** The monochrome palette, minimal makeup and structured silhouette keep it fresh and wearable — suggesting how someone might reinterpret the Lara Croft look for a fashion event or street style.
