

## Genelia Deshmukh Channels Old?Bollywood Glamour in Tonal Anavila Sari

Published on 11 Dec 2025 | By IFI Correspondent

Bollywood actor and style icon **Genelia Deshmukh** recently delivered a stunning Indianwear moment that echoed the elegance of *old?Bollywood glamour*. Her outfit of choice — a deep rose **Anavila sari** — showcased a harmonious blend of classic charm and contemporary sophistication, earning attention from fashion enthusiasts across social media and style circles.

### A Sari with Subtle Texture and Timeless Appeal

The highlight of Genelia's look was a **tonal baroque Anavila sari** crafted from a rich combination of **organza and mulberry silk**. The six?yard drape featured a **baroque rose pattern** in a unified colour family, with delicately sewn pink sequins scattered across the fabric to add gentle shimmering accents. A slender silk border beautifully framed the fluid silhouette, lending definition and elegance to the ensemble.

### Elegant Styling and Jewellery Choices

Genelia paired the sari with a **fitted blouse** featuring quilted embroidery, creating a striking contrast with the light textile of the sari itself. Her jewellery was carefully chosen to amplify the old?world feel—a **multi?layered kundan necklace** and matching kundan studs added rich, traditional accents to the overall look.

Her beauty choices reflected the vintage allure of the outfit: **softly defined eyes, a deep lip colour, a small bindi**, and hair styled in **loose brushed?out waves with a deep side part** completed the cinematic aesthetic, evoking memories of classic Hindi film heroines.

### Fashion Desk Tips

While Genelia's look beautifully captures old?school glamour, small styling tweaks can make it even more contemporary. Suggestions included swapping the kundan studs for **long Art Deco earrings** or replacing the multi?strand pearls with a **single diamond lariat** to open up the neckline and elevate the silhouette. Adding a metallic clutch in antique silver was also recommended to introduce contrast into the tonal pink palette.
