

Maxfield & Rick Owens Unveil Ultra-Limited “Vintage Sneaks” Footwear Collaboration

Published on 22 Dec 2025 | By IFI Correspondent

In a standout moment for luxury fashion and sneaker culture, Los Angeles-based high-end retailer **Maxfield** has debuted its **first ever footwear collaboration** with acclaimed designer **Rick Owens**. The limited-edition release — *Vintage Sneaks by Rick Owens for Maxfield* — marks a rare partnership in the designer’s footwear lineage and underscores both brands’ commitment to experimental design and exclusivity.

The capsule drop is **extremely limited**, with **just 24 pairs available worldwide**, offered in both men’s and women’s sizing. Each pair has been crafted exclusively for Maxfield by Owens himself, making this collaboration a highly coveted addition for collectors and fashion enthusiasts alike.

What sets these sneakers apart is their **material innovation**. The uppers are fashioned from **black pirarucu leather** — sourced from one of the Amazon Basin’s largest freshwater fish and prized for its distinctive scaled texture. This unusual choice reflects Owens’ ongoing exploration of unconventional luxury materials and adds a tactile, sculptural quality to the silhouette.

Design details include an **under-ankle height, eight-eyelet lace-up construction**, structured toe caps, and a **triangular leather appliqué** along the side. The sneakers are anchored by Rick Owens’ signature **shark-toothed bumper sole**, a visual hallmark of the designer’s footwear aesthetic. A custom **red insole**, co-branded with both Rick Owens and Maxfield logos, completes the exclusive look.

The *Vintage Sneaks* are available **exclusively at Maxfield’s Los Angeles and Malibu boutiques**, as well as through the retailer’s online store, offering a rare opportunity for fashion insiders to secure a piece of this unique collaboration.

This debut footwear partnership highlights the enduring influence of both Maxfield and Rick Owens in the luxury fashion space, bridging cult-status design with collectible scarcity.
