

Raveena Ravi Addresses Three Years of Online Harassment from Two Brothers

Published on 06 Feb 2026 | By IFI Correspondent

Actress Raveena Ravi has publicly shared her harrowing experience of enduring three years of relentless online harassment from two unidentified brothers. The talented actress, known for her vibrant performances, revealed that these individuals used fake social media accounts to inundate her with a barrage of threatening, abusive, and pornographic messages. This relentless campaign has profoundly affected her mental health and well-being, prompting Raveena to advocate for greater awareness and accountability in addressing such alarming trends in cyberbullying.

The severity of her experience highlights a disturbing reality that many women face in the digital age—unrelenting harassment and intimidation. Raveena's candid revelations shed light on the psychological toll that such harassment can inflict. Despite taking action, including reporting the incidents to the police, the harassment has not subsided, which raises significant concerns about the effectiveness of current laws and the enforcement of protections against online abuse.

In her recent statements, Raveena emphasized the critical need for society to remain vigilant against online harassment and for law enforcement agencies to take strict actions against offenders. She also called for public awareness regarding the dangers that can lurk behind anonymous online interactions, stressing that such behavior should not be tolerated. Raveena's brave stance encourages others who have faced similar situations to speak out and seek justice, thereby fostering a safer online community for all individuals. It is essential for both the public and authorities to address the disturbing rise of digital harassment, ensuring a robust response to protect victims and hold aggressors accountable.
