

Kartiki Shirish Bhosale: Empowering the Next Generation Through Education, Guidance and Confidence

Published on 19 Oct 2026 | By IFI Correspondent

Giving a new direction to quality education, parental guidance and teacher development through Ashreya Gurukul Academy

Recognising the hidden potential in every child and nurturing their confidence and personality has been the driving force behind Mrs. Kartiki Shirish Bhosale's journey in education. An educator, trainer, education entrepreneur and parental guide, she has established her own identity in the education sector as the Founder and Director of Ashreya Gurukul Academy in Sion, Mumbai.

Kartiki believes that every child is unique and possesses special abilities that deserve to be recognised and nurtured. Rather than comparing children with one another, she emphasises understanding their individual needs, identifying their interests and providing the right guidance to help them grow. Her educational approach focuses on conceptual clarity, individual attention, regular assessments, skill development and building self-confidence.

Ashreya Gurukul Academy: Creating a Positive Learning Environment

Through Ashreya Gurukul Academy, Kartiki aims to provide students with quality academic guidance and a supportive learning environment. Her approach goes beyond academic performance, focusing on helping children develop a deeper understanding of concepts, improve their abilities and become more confident learners.

She believes that meaningful education should encourage curiosity, independent thinking and the development of each child's individual strengths. By providing structured guidance and personal attention, she strives to make learning more effective, engaging and rewarding for students.

Her vision is to create an environment where children feel encouraged to ask questions, overcome difficulties and work towards their goals with confidence.

Empowering Teachers and Creating Professional Opportunities

Kartiki's contribution to education extends beyond the classroom. Through her academy, she has built a team of more than ten teachers, creating opportunities for employment, collaboration and professional growth.

She recognises that teachers play a vital role in shaping children's futures. Supporting educators, strengthening their skills and creating an environment in which they can grow professionally are therefore important aspects of her work.

By developing an educational institution that brings together students and teachers, she is working towards a model that supports both quality learning and sustainable professional opportunities within the education sector.

Recognition for Her Contribution to Education

Kartiki's efforts have received recognition through awards presented by Kids Intelligence. In 2023, she received the **Supportive Teacher Award**, followed by the **Multidimensional Teacher Entrepreneur Award** in 2025.

These recognitions reflect the multiple dimensions of her work as an educator and entrepreneur, combining teaching, student development and institution building.

She also contributes to early childhood education and activity-based learning through her professional association with Kids Intelligence – Powered by Aichi Shala Preschool and Activity Centre. Such initiatives complement her broader interest in creating meaningful learning experiences for children.

Guiding Parents and Strengthening Parent-Child Relationships

Kartiki believes that a child's development is influenced not only by the school environment but also by the support and understanding they receive at home.

Parental guidance is therefore an important part of her educational philosophy. She encourages parents to understand their children's individual needs, recognise their strengths and provide support without placing unnecessary pressure on them.

Strengthening parent-child relationships and helping families approach children's development with greater awareness are central to this aspect of her work.

Her approach also seeks to bring traditional values together with modern educational methods, creating a balanced foundation for children's academic, emotional and personal development.

Building a Confident and Responsible Generation

For Kartiki Shirish Bhosale, education is not limited to textbooks, examinations or academic achievements. It is a continuous process of developing confidence, nurturing abilities and preparing children to face life's challenges.

Through Ashreya Gurukul Academy, teacher development initiatives and parental guidance, she is working towards a broader vision of education that benefits students, families and educators alike.

Her journey highlights the importance of recognising individual potential, creating supportive learning environments and giving teachers the opportunities they need to make a meaningful difference.

By combining education, mentorship and entrepreneurship, Kartiki continues to work towards nurturing a generation that is confident, capable and responsible.
