

Anjali Hemant Sonar: Harnessing Solar Energy for a Cleaner and More Sustainable Future

Published on 19 Oct 2026 | By IFI Correspondent

Through SES Solar Network & Solutions, Anjali Hemant Sonar is working to expand awareness of solar energy and make sustainable energy solutions more accessible.

In a world increasingly focused on clean energy and environmental responsibility, **Anjali Hemant Sonar** has built her entrepreneurial journey around the potential of solar power. As the Chief Executive Officer of **SES Solar Network & Solutions**, she is committed to promoting solar energy, guiding customers towards suitable solutions and contributing to a more sustainable future.

With the support of her husband, Hemant Sonar, Anjali began her journey in the solar energy sector with a vision of encouraging the use of environmentally friendly energy alternatives. What started in Amravati is now moving towards her broader ambition of expanding the business across India.

Building a Career in Solar Energy

Born on 16 August 1982 in Shiraj (Bandh), Amravati district, Maharashtra, Anjali Hemant Sonar has gained more than seven years of experience in the solar energy sector, according to the information provided about her professional journey.

As CEO of SES Solar Network & Solutions, she focuses on helping customers understand the potential of solar power and identify solutions suited to their requirements. Her approach emphasises customer guidance, service quality and reliability—important considerations for people and organisations exploring solar energy options.

She believes that modern technology can help bring the benefits of solar power to a wider audience. By making information and appropriate solutions more accessible, her work aims to encourage greater awareness and adoption of renewable energy.

Promoting Clean Energy and Customer Trust

For Anjali, working in the solar energy sector involves more than offering products or services. Understanding customer needs, presenting practical and affordable options, and maintaining dependable service are central to the business philosophy she follows.

Solar power can help reduce dependence on conventional energy sources and support efforts to limit environmental impact. As interest in renewable energy grows, businesses that provide clear guidance and suitable solutions can play a meaningful role in helping customers explore cleaner alternatives.

Through SES Solar Network & Solutions, Anjali seeks to contribute to this transition while building long-term relationships with customers. Her professional journey reflects the role that entrepreneurship can play in connecting emerging energy technologies with everyday needs.

Recognition for Her Work

Anjali's profile also includes recognition through awards such as *Suryacon*, *Maharashtra Udyojika*, *Maharashtra Suryacon* and *Indian Icon*. These honours, as reported in the information provided, have encouraged her to continue working towards a wider reach for her business and its clean-energy vision.

For entrepreneurs, recognition can serve as motivation to strengthen their work, build credibility and pursue new opportunities. Anjali's journey illustrates her continued interest in developing her presence in the solar energy sector.

A Vision for Expansion and Sustainability

Anjali Hemant Sonar's journey represents an entrepreneurial effort to combine business development with an environmental purpose. With SES Solar Network & Solutions, she aims to bring solar energy solutions to more customers and expand the business beyond its beginnings in Amravati.

Her story highlights the growing importance of renewable energy awareness and the contribution women entrepreneurs can make in emerging sectors. As she works towards wider business expansion, her focus remains on customer guidance, service and the possibilities of a cleaner energy future.
